SEA MASTER SOFTWARE

Smarter Ship-Management with SeaMaster

APPROVED BY DNV AND CLASS NK

WHO WE ARE?

What We Do?

Founded in 2012 in the UK, SeaMaster Management. is a leading ship management company, providing essential goods and services to the commercial fleet, along with crew and technical management for some of the world's largest and most complex vessels.

We offer a comprehensive range of ship management services tailored to the unique needs of ship owners, including technical and engineering support, crew training and management, new build supervision, insurance, independent surveys, superintendence, audits, and commercial management.

SeaMaster ISMS has been built on a foundation of expertise, innovation, and dedication. Since 2012, our team of experienced maritime professionals and software technology experts has been committed to developing solutions that enhance efficiency and safety in the maritime industry.

SeaMaster Management. is the owner and developer of the SeaMaster Software Suite, a digital solution designed to optimize maritime vessel management.

We cover over **1,500**
individual users

Insight at Your Fingertips

What is SeaMaster?

SeaMaster is an all-in-one ship management solution designed to optimize operations across crew, inventory, maintenance, and finance. From day-to-day vessel operations to long-term planning, SeaMaster empowers shipping companies to sail smarter and manage with confidence.

SeaMaster Software Modules

Operation

Manage vessel specifications, contracts, voyage planning, daily reports, certificates, inspections, and more – all from a powerful operational dashboard.

Crew

Streamline crew management with tools for certifications, evaluations, contracts, salary processing, attendance tracking, and compliance monitoring.

Stock & Inventory

Efficiently control inventory, purchases, stores, and deliveries with advanced tracking and reporting capabilities.

PMS

Optimize planned and unplanned maintenance with component tracking, job scheduling, defect management, dry dock projects, and condition-based maintenance (CBM) reporting.

Indent

Efficiently manage supply, service, and repair requests, along with inquiries, quotations, and deliveries.

Financial

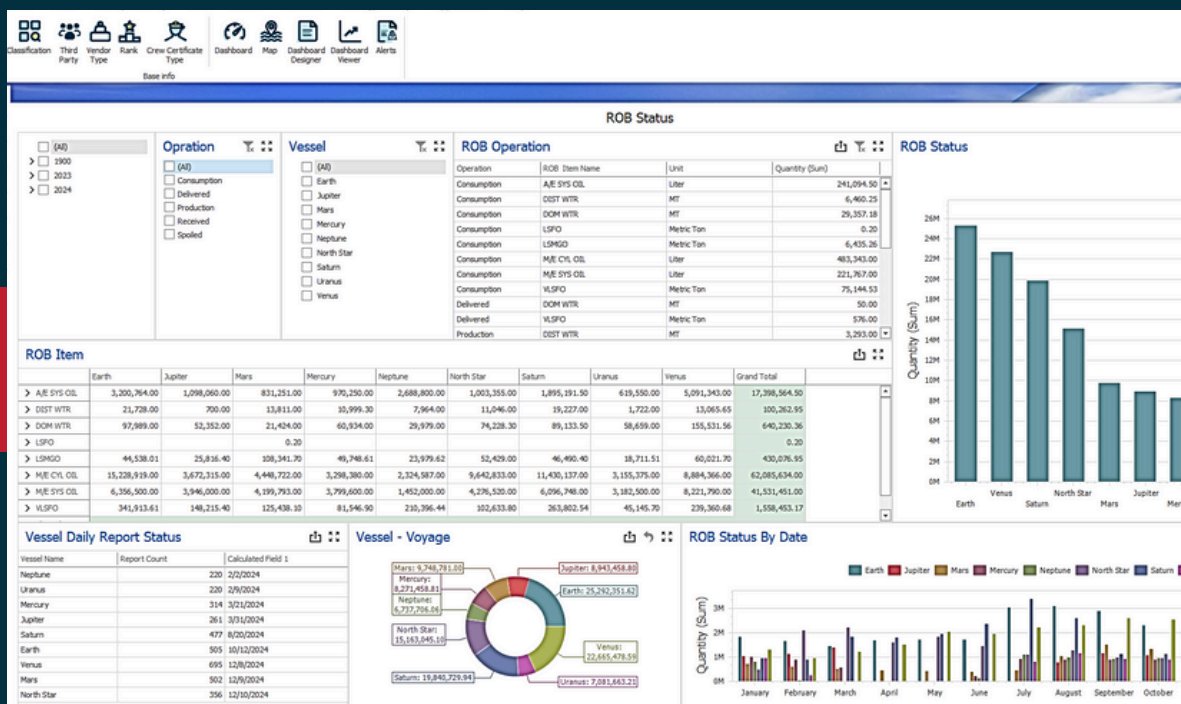

Monitor and control budgets effectively with real-time tracking of costs, payments and customizable approval processes.

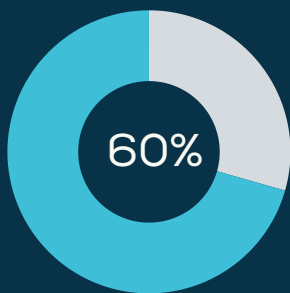

The Wisdom of 15 Years, Integrated into Every Click

Gain a decisive market advantage through access to SeaMater's validated, real-time maritime data, empowering you to make informed decisions with unparalleled speed and transparency. As the industry's leading source, our solutions, renowned for comprehensive coverage, and flexible data delivery, ensure you stay ahead of the curve.

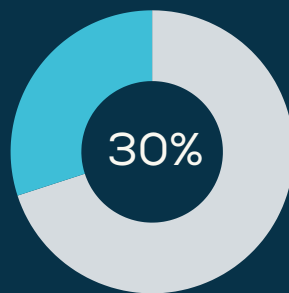

A Global Presence

Powering Maritime Operations Across Borders

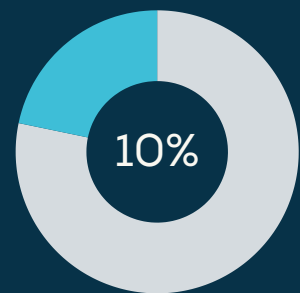

United Kingdom

60% of our total users, approximately 900 users, are based in the UK. This highlights SeaMaster's strong presence in one of the world's major maritime hubs.

United Arab Emirates

30% of our users, around 450 users, are located in the UAE, demonstrating the adaptability of our software to regional market needs.

Singapore

10% of our total users, approximately 150 users, are from Singapore, a critical global center for maritime trade.

WITH US

Why Choose SeaMaster?

Our state-of-the-art, modular platform offers unmatched flexibility, allowing organizations to tailor their systems to current needs and effortlessly scale as they grow.

With minimal disruption to existing workflows, SeaMaster empowers you to elevate fleet management, enhance operational excellence, and maintain a competitive edge in an ever-evolving global market.

Here's what sets SeaMaster apart:

Integrated
End-to-End
System

SeaMaster centralizes all ship management functions into a single platform.

Strong Customer
Support and
Customization

SeaMaster offers 24/7 support for onboarding, troubleshooting, and system maintenance.

Smart
Reporting and
Analytics

SeaMaster provides quick, customized insights for analysis and performance tracking.

Scalable &
Cost-
Effective

SeaMaster is a cost-effective, scalable solution that reduces manual.

Through these values, we strive to build lasting relationships based on trust, responsibility, and mutual respect, contributing to a sustainable and fair business environment.

Certified Maritime Software Quality

Maximize your shipping potential with our software

At SeaMaster, our commitment to excellence is reflected in the certifications we have earned for software development. Each certification demonstrates our dedication to delivering reliable, secure, and high-performing maritime management solutions. By adhering to internationally recognized standards, we ensure that our software not only meets but exceeds the quality and compliance expectations of the maritime industry.

DNV-GL Certification

SeaMaster Software Suite is certified and approved by DNV-GL Certificate NO. ICC10275TA01(2017)

This certification is a testament to SeaMaster's commitment to excellence and adherence to industry-leading standards.

ClassNK Certification

SeaMaster Software Suite has achieved Class certification and received the prestigious NK Certificate NO.23S002 (2023).

Value

Predictive Vessel Care.

SeaMaster uses smart diagnostics to anticipate issues before they surface – keeping your fleet efficient, safe, and always ready.

Live Fleet Intelligence.

Access real-time operational insights from anywhere – docked or deep at sea.

Full control, zero blind spots.

SeaMaster delivers live insights, actionable alerts, and intelligent reporting – whether you're onshore or mid-ocean.

Budget Management

Maintain strict budgetary adherence and prioritize operational efficiency.

Workflows, Your Way.

Customize every workflow – from drydock schedules to voyage plans – with precision to match how you run your fleet.

Forecast.

With the history of AI deep learning, forecast the PVM & CBM jobs.

Consumption Overview.

Observe Lub/Oil & Fresh Water Supply and Consumption Data Collection & Recording.

Designed Around You.

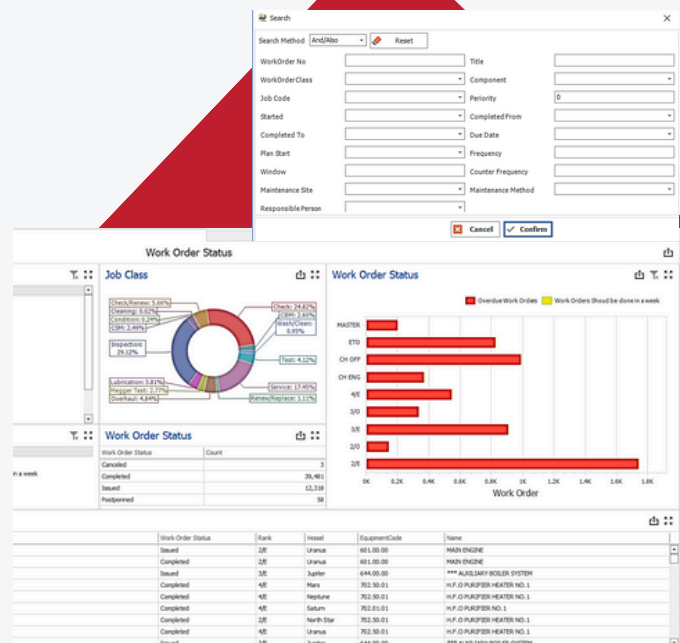

Flexible. Customizable. Built for the unique demands of YOUR fleet – not a one-size-fits-all solution.

Dashboard

SeaMaster's Customisable Dashboard transforms complex maritime asset management into a streamlined, user-friendly experience, promoting safer and more efficient operations.

By presenting critical ship data through a clear and intuitive graphical interface, SeaMaster empowers both onboard crews and shore-based teams with instant access to real-time information. Decision-making becomes faster, smarter, and more reliable.

Our Services

➤ Data Integration

We prepare and configure all necessary databases for vessel systems and equipment, ensuring smooth integration into the SeaMaster Software functional modules. Our expertise in data management ensures that maritime operators have access to accurate, reliable, and well-structured information.

Smooth Installation

➤ Installation

SeaMaster software may be used as a single installation or multi-users installation. SeaMaster has prepared various databases in the form of spreadsheets that can speedily be transferred and edited for new installations

Database Building

Supported Training

In House Support

Online/In-Person Training

Training Videos

Customization reports

➤ Training

The SeaMaster Team offers comprehensive training and support tailored to individual client needs, encompassing corporate group or one-on-one sessions, self-paced online learning through educational materials, readily available technical support via chat, online meetings, or phone, and a detailed User Instruction Handbook covering all software modules.

24/7 Support

user manual

➤ Support

Our team experts provide 24/7 support and services to create a valued end-to-end ship management experience for you. We are committed to delivering exceptional customer service and ensuring that all of our clients have the resources they need to manage their fleets effectively.
